

ABSTRACT OF THE DISCLOSURE

An information processing apparatus includes a responding part which makes a response to a terminal without waiting for a completion of processing which is
5 caused to be executed by a service providing apparatus; a processing state obtaining part which obtains a state of the processing concerning the service providing request, from the service providing part; and a Web page generating part which, in response to a Web page display
10 request made by the terminal, generates a Web page to display the state of processing which is obtained via the processing state obtaining part, and transmits the thus-produced Web page to the terminal.
